

# STOP THINK CONNECT

## *Privacy tips for public computer & wireless network users*

Please practice safe online habits when using public devices.  
Personal information is like money. Value it. Protect it.

### REMEMBER ME NOT

Make sure the "remember me" function is disabled when you use a public computer.

### BROWSING HISTORY

Delete your cookies and browsing history when you finish using a public computer.

### LOG OUT

Anyone can access public computers, and you wouldn't want just anyone to have access to your personal information and accounts. Always close all browser tabs and log out of your accounts when you are done using a public computer.

### SECURE WEBSITES

Look for web addresses with "https://" or "shttp://" when entering personal information.

### PUBLIC WI-FI

Limit the type of business you conduct when connected to a public network.
